Western Massachusetts Substance Abuse Treatment and Prevention Services Service and Program Types

Acute Treatment Services:

Medical stabilization for individuals in need of detoxification in a medically monitored environment.

Transitional Support Service:

Structured residential support and case management for individuals post detox and in transition to residential placement. Must be referred from an ATS program or homeless shelter.

Clinical Support Service:

Clinically managed high intensity short-term residential program for individuals not in need of detox. Can be referred by ATS or from the community.

Ambulatory:

Outpatient Counseling: Assessment, counseling and follow-up for individuals and families experiencing problems with alcohol and other drugs. Psycho educational groups may be offered to those at risk of substance abuse or addiction.

Day Treatment: Day treatment provides each client with 3.5 hours of counseling, five times per week; individual, group and family counseling, relapse prevention, communicable disease prevention, case management, and encouragement of the use of self help groups.

Driver Alcohol Education: Driver alcohol education for individuals convicted of first offense of driving under the influence of alcohol. Comprehensive assessment, 16 interactive group sessions, introduction to self-help and referral for treatment as needed.

Compulsive Gambling: Provides information, referral and outpatient counseling for the treatment of compulsive gambling.

Second Offender Aftercare: Assessment and counseling for individuals convicted of second offense of driving under the influence of alcohol.

Recovery Engagement and Home-based Services

Home-based substance abuse treatment and case management services to families where substance abuse is identified by the Department of Children and Families.

Office-based Opioid Treatment:

Buprenorphine treatment within a community health center setting or medical office.

Opiate Overdose Prevention:

Narcan distribution, training and education for active opiate users, family member, friends and treatment staff.

Opioid Treatment Programs:

Methadone maintenance and outpatient detox for opiate addicted individuals.

Residential Rehabilitation:

Recovery Home: A transitional residence for men and women, eighteen years of age and older, who are in the early stages of substance abuse recovery. They provide a home-like atmosphere in which recovering alcoholics and drug addicts receive individual and/or group counseling, educational and vocational training, and support that helps residents to return to independent, drug-free living in the community. All programs are staffed seven days per week, twenty-four hours per day.

Social Model Recovery Home: A transitional residence for men and women eighteen years of age and older, who are in the early stages of substance abuse recovery. Social Model Recovery Homes provide a lightly structured, drug-free environment. This supportive environment is maintained through twenty-four hour staffing and case management services. The emphasis is placed on assisting residents to provide one another with a culture of recovery, support, sharing, and positive peer role modeling.

Supportive Housing:

Supportive Case Management for Housing provides case management services within an alcohol and drug-free living environment that reinforces recovery through establishing community-based supports to maintain ongoing goals in the recovery process. Supportive Housing programs have linkages with a range of services in the continuum of care. These linkages will assist and support residents to address primary health concerns, as well as develop skills and abilities to sustain recovery, continue to establish independence, and provide opportunities for aftercare planning.

Post-detox Housing:

Permanent housing for individuals who can benefit from a sober housing environment and case management services.

Recovery Support Center:

A center that offers people in recovery peer support that helps to prevent relapse and promote sustained recovery from alcohol and drug use. The center will offer an environment which enhances life skills and creates opportunities to connect with others in recovery and the broader community. Information about treatment services and referral to treatment will also be offered.

Intervention Programs:

Programs that provide services to families where substance abuse may be a problem for one or more family members. These services teach families strategies for engaging the substance user into treatment, strategies for building healthy communication to prevent substance use problems and parenting tools to help parents reduce the chances of substance abuse among their children.

Prevention Services:

Prevention Programs and Community Coalitions: Offer primary prevention services and opportunities to increase the factors in the lives of youth at risk that protect them from substance use and decrease their risk of health problems. Science based curriculums are used for youth programming and environmental strategies are used within community coalitions.

All Pregnant Women seeking substance abuse treatment have priority access to treatment in Massachusetts. If you need further assistance in accessing services for pregnant women, please call the *Institute for Health and Recovery* at 617-661-3991.
